### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26-40 are again rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14, 16-29 and 32 of U.S. Patent No. 5,658,956. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application teaches a bioadhesive composition comprising a film forming agent, pyruvate, an antioxidant and a mixture of saturated and unsaturated fatty acids; and the patented application teaches a therapeutic bioadhesive-wound healing composition comprising a bioadhesive agent, a wound healing composition containing a pyruvate, an antioxidant, and a mixture of saturated and unsaturated fatty acids. Note the film forming agents or bioadhesive agents are carboxymethylcellulose and methylcellulose are the same. The present application instant bioadhesive composition clearly reads on the patented application since the present applicant's composition is broad.

Claims 26-40 are not allowed.

Art Unit: 1614

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 27 is again rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Again, applicants' specification does not teach or disclose the newly added film forming agents that are used in the instant bioadhesive film composition such as polyvinyl pyrrolidine, carboxyvinyl polymers, methylcellulose, hydroxymethylcellulose, hydropropylmethylcellulose and carboxymethylcellulose and salts thereof and combination thereof.

Applicants' remarks regarding the newly added film forming agents are taught on page 10, lines 13-14 are not persuasive since the described lines only disclose a phrase, "suitable cellulose" which is very broad and does not disclose the said film forming agents. The only film forming agent that is taught in the applicants' specification is pullulan and polyvinyl alcohol.

Claim 27 is not allowed.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 26-40 are again rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for film forming agent, such as pullulan, does not reasonably

provide enablement for film forming agents, such as polyvinyl pyrrolidone, carboxymethylcellulose, carboxyvinyl polymers, methylcellulose, hydroxymethylcellulose and hydroxypropylmethycellulose and salts thereof and combination thereof. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make or use the invention commensurate in scope with these claims.

Claims 26-40 are not allowed.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-40 are again rejected under 35 U.S.C. 102(b) as being anticipated by Martin et al. (A).

Applicants' remarks do not explain the differences between the prior art and the present invention.

Claims 26-40 are not allowed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until

Art Unit: 1614

after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
